PERSONAL PROFILE

Good Listener, patient and determent
I also usually like to add some humor to a bad day

- Expanding my knowledge and skill set is always crucial for my career development
- I have complete experience from start to end phases in agency and corporate projects. This includes planning, strategies, presentations, client services, UI and UX layout, design, time management and quality control.
- This knowledge and experience gives one a full understanding of every required deliverable in today's competitive development market.
- When working in teams I found that the most important ingredient for a project's success is communication, for every member to know their role and deadline.
